EXPERIENCE

HashMicro

Jakarta, Indonesia

Feb 2025 – Feb 2026

- **Frontend Web Developer**

- Maintained high-traffic "moneysites" and 3 official blogs across 4 Southeast Asian regions, supporting over 200,000 monthly active visitors and ensuring 99.9% uptime.
- Collaborated with the developer team, backend developers, and SEO Specialists to ensure the websites ran smoothly and met international brand standards.
- Created various new components such as widgets, popups, Call to Actions (CTAs), and forms, and standardized the "Hashy" navbar across all regional sites.
- Developed applications from scratch, including a Cash Book, a POS (Point of Sales) system, and a Work Schedule Maker for HashMicro Indonesia and Philippines.
- Executed responsive design and asset compression strategies, boosting Google Lighthouse performance scores by 30 points and reducing page load latency by 20% for mobile and desktop users.
- Diagnosed and resolved over 150 critical configuration and redirect issues monthly across Indonesia, Singapore, Malaysia, and Philippines domains, minimizing localized downtime.
- Supported the SEO team by improving blog structures, reorganizing categories, and adjusting content to optimize it for digital campaigns.
- Developed a custom Admin Dashboard for the SEO team, automating data entry for analysis and reducing manual reporting time by 10 hours per week; optimized site architecture to increase organic search visibility by 80%.

ScaleOcean

Jakarta, Indonesia

April 2026 – Present

- **Web Developer**

- Spearheaded the complete from-scratch revamp of the ScaleOcean platform and blog, architecting a high-performance, SEO-optimized frontend using Next.js 16 App Router and React 19.
- Engineered a decoupled Headless WordPress CMS infrastructure with custom PHP REST APIs, establishing a secure content pipeline and strict data sanitization protocols.
- Architected a comprehensive multi-locale internationalization (i18n) system for the Indonesia, Singapore, and Philippines markets, streamlining regional content delivery.
- Developed a highly tailored lead capture engine featuring advanced marketing attribution and GTM tracking, enabling granular user tracking to optimize digital campaign ROI.
- Implemented aggressive asset compression and modern rendering strategies, ensuring lightning-fast load times and elevating organic search visibility across all target regions.

EDUCATION

BINUS University

Jakarta, Indonesia

Bachelor of Science, Major in Computer Science

GPA: 3.62/4

Honors & Awards: - Achieved a Top 15 ranking in the IO-Fest UNTAR UI/UX Competition, advancing to the Semifinals by outperforming competing teams in user research, wireframing, and high-fidelity prototyping.
